PLAY WITH YOUR IDEAS

The Collectors: Holiday Edition

Leftover presents are going up for auction at Santa's Workshops!

You and your team will travel to the North Pole and purchase presents for schools around the world.

These presents may contain a much wanted sled, a doll house for a little girl or simply a lump of coal from the naughty list. You and your team will work together to maximize your score by collecting the most valuable presents at 3 of Santa's workshops.

This online simulation game will put your remote teams into an experience in which they will:

- Utilize multiple forms of technology to collaborate as a team
- Communicate clearly establishing their personal and collective tasks and goals
- Make decisions under pressure based on information gathered and shared
- Use their influence to plan and empower in changing and uncertain situations
- Establish a quick process of feedback to more efficiently accomplish their goals
- Create and implement a shared direction for a successful outcome
